

## **Indigenous and Norse Narratives Major Project**

You are only required to select three (3) of the following five (5) assignments. Before selecting the assignments, you must choose to use your Myth, Legend, or Fairy Tale for this project. Each assignment will require the use of whichever piece of literature you select. Please circle the assignments you have chosen.

For this project, I will be using my:

1) **Create a film version of your story.** The video should remain school appropriate and will be marked on how closely it follows your written story, along with the amount of effort that is put into it. Special effects are not required.

2) **Turn your story into a Graphic Novel or Comic.** You can do this either by hand or on the computer. This will be marked on how closely it follows the original story along with the clarity of the comic (can everyone understand what is going on from frame to frame?).

**3) Write a revised version of your story.** This means that you will make significant changes to your story that will increase its length and expand on the plot of the original. You will be marked on the changes made to the original version. (15 marks)

**4) Perform an oral read of your story for the class.** You will be marked on your clarity, volume level, inflection, and your level of enthusiasm.

**5) Create an illustrated cover page for your story.** Imagine that your story was being published and was going to be mass-produced. Your job for this assignment is to create the front cover for your book. You will be marked on the quality of the artwork and on how well it relates to the story.
